

Get Ready for EV Charging Substantial Rebates Now Available

More of your potential customers are driving electric ...

Commercial properties in Los Angeles, Orange, Riverside and San Bernardino counties are eligible for charging station rebates to prepare for the explosive growth of electric vehicles (EVs).

With California's goal of 1.5 million zero-emission vehicles on the road by 2025, increasing numbers of drivers are seeking businesses that offer EV charging. It's an important consideration when running errands, traveling or choosing shopping and dining destinations.

Providing EV charging builds goodwill and customer loyalty with surveys showing it increases customer dwell times by an average of 50%.

Save Now & Be EV Ready

Find out how you can receive up to \$80,000 to purchase and install a new DC fast charging station to start meeting your customers' expanding EV charging needs.

The Southern California Incentive Project (SCIP) is part of the statewide California Electric Vehicle Infrastructure Project (CALeVIP), funded by the California Energy Commission.

SCIP works with local partners to accelerate EV adoption by incentivizing charging infrastructure, while supporting the state's goals to improve air quality, fight climate change and reduce petroleum use.

Eligible SCIP applicants can apply for rebates up to \$70,000 per DC fast charger for new installation sites or sites with stub-outs. Up to \$40,000 per installation is available for replacement and make-ready sites. In disadvantaged communities, rebates are up to \$80,000 per installation regardless of site type.
