

**ENVIRONMENTAL JUSTICE ENFORCEMENT TASK FORCE
COACHELLA VALLEY
AGENDA ITEM FOR NOVEMBER 2018 MEETING**

Requested by:	Trish Johnson, Trish.Johnson@arb.ca.gov , 916-445-3365
Title of Topic:	CARB's research planning process
Purpose (outreach, information needed, general discussion, update, solicit request, etc.)	Describe current and planned research related to health and environmental justice.
Desired Outcome (outreach, action, more information, status update, training, etc.)	Hear from community members about concerns related to issues of health and exposure to toxic emissions in California communities and direction for research going forward.
Background (Information on the subject matter, past actions, report, etc.)	The Triennial Strategic Research Plan reflects a concerted effort to identify CARB's highest priority research needs for the next three years. The research initiatives in the Plan build on past research and will support the implementation and development of policies and regulations, and advance the state of the science in the areas of health, environmental justice, air quality, and climate. The research initiatives in the Plan were developed in an open public process, in consultation with stakeholders and research partners, through a public workshop on January 26, 2018, individual meetings, and other outreach efforts. The research initiatives will guide CARB's annual funding of individual research projects. Projects will be fulfilled through externally contracted research projects as well as in-house studies.
